

## Thank to Liz for sending this in.

Clarification of the lockdown rules for you all, it's important that you read them and act accordingly

1. You must not leave the house for any reason, but if you have a reason, you can leave the house
2. Masks are useless at protecting you against the virus, but you may have to wear one because it can save lives, but they may not work, but they may be mandatory, but maybe not.
3. Shops are closed, except those shops that are open.
4. You must not go to work but you can get another job and go to work
5. You should not go to the Doctor's or to the hospital unless you have to go there, unless you are too poorly to go there.
6. This virus can kill people but don't be scared of it. It can only kill those people who are vulnerable or those people who are not vulnerable. It is possible to contain and control it, sometimes, except that sometimes it actually leads to a global disaster.
7. Gloves won't help, but they can still help so wear them sometimes. .or not. Just do not leave them on the floor of the Aldi car park cos that means you're an imbecile who should not be allowed out.
8. Stay HOME; but it is important to go out
9. There is no shortage of groceries in the Supermarket, but there are many things missing. Sometimes you won't need loo rolls but you should buy some just in case you need some.
- 10 The virus has no effect on children except those children it affects
- 11 Animals are not affected but there was a cat in Belgium that tested positive in February when no one had been tested... plus a few Tigers here and there.....
12. Stay 2 metres away from tigers (see point 11 )
13. You will have many symptoms if you get the virus but you can also get symptoms without getting the virus, get the virus without having any symptoms or be contagious without having any symptoms or be non contagious with symptoms.....it's a sort of lucky dip!!!
14. To help protect yourself you should eat well but eat whatever you have on hand as it's better not to go to the shops, unless you need toilet rolls or a fence panel.
15. It is important to go get fresh air but do not go to Parks but go for a walk. Do not sit down except if you are old, but not for too long or if you are pregnant or if you are not old or pregnant but need to sit down. If you do sit down don't eat your picnic, unless you have had a long walk, which you are/ aren't to do if you are old or pregnant
- 16 Do not visit old people but you have to take care of old people and bring them food and medication
- 17 If you are sick, you can go out when you are better but anyone else in your household can't go out when you are better unless they need to go out.
- 18 You can get restaurant food delivered to the house. These deliveries are safe....But groceries you bring back to your house have to be decontaminated outside for 3 hours or three days including frozen pizzas.
- 19 You cannot see your older mother or grandmother BUT they can take a taxi and meet older taxi drivers.
- 20 You are safe if you maintain social distance when out but you cannot go out with friends or strangers at the safe social distance
- 21 The virus remains active on different surfaces for 2 hours....or 4 hours or 6 hours....I mean days...not hours...but it needs a damp environment....or a cold environment that is warm and dry...in the air as long as the air is not plastic..
- 22 Schools are closed so you need to home educate your children, unless you can send them to school because you are not at home. If you are at home you can home educate your children using various portals and virtual class rooms unless you have poor internet ..or more than one child and only one computer or you are working from home. If you are home educating you can start drinking at 10am.
- 23 If you are not home educating you can also start drinking at 10am
- 24 The number of deaths related to Corona will be announced daily but we do not know how many people are infected as they are only testing those who are almost dead to find out if that is what they will die of... The people who die of corona who aren't counted won't or will be counted but maybe not.
- 25 We should stay in locked down until the virus stops infecting people but it will only stop infecting people if we all get infected so it is important that we all get infected and some don't get infected.

HOPE THAT MAKES THINGS CLEARER FOR YOU
